INTENDED USE: QUALITY VERIFICATION**AND RESALE**

This report provides a high quality, well detailed Gemmologists verification for an item offered for sale. After a thorough examination the Gemmologists report describes and documents the quality of the jewellery or watches listed and provides an opinion of its current value.

For a seller it assists them to represent the item for sale with a correct description. For prospective buyers the descriptive detail informs them of the quality of the item.

If the item is sold by the current owner we recommend the report is updated to be an Insurance Valuation and to show the purchasers name. However the retail comparison cost shown on this report should provide adequate Insurance replacement cover for a period of one year from the report date.

BASIS OF VALUE

The following bases of value have been used in this report:

ANTIQUÉ PERIOD REPLACEMENT COST

As the valuer cannot identify a new equivalent item for sale, this is the estimated cost to replace on the antique retail market with a similar article of equivalent quality in restored condition. This will only be used on articles that would be considered antique or of a distinct 20th Century period such as Art Nouveau or Art Deco.

The items described in this report have been examined using current best valuation practice methods and standard gemmological equipment.

Unless stated otherwise stones have not been removed from their mountings or examined loose from the setting. Therefore gemstone weights, grades and measurements should be viewed as a professional opinion of the valuer and not as fact.

If items are unstamped precious metals are tested by acid or electronically and the reported metal and quality is as tested by the valuer.

No part of the valuing process is destructive to the article. We accept no responsibility for any future damage or future loss of parts or all of the item.

Some gemstones are treated to improve their colour and/or clarity. These treatments usually require advance gemmological laboratory testing to identify and quantify, which is beyond the scope of this report. If you are concerned about gem treatments please contact me for specific advice.
